**Curriculum:** Huffman K9’s 3-day advanced wilderness man tracking course is a comprehensive training course focused on expanding on the fundamental skills of the K9 team in man tracking and preparing students for real world scenarios.

Handlers will learn to develop tracking K9 capabilities in different ages of K9's, learn how to develop tracking effectiveness and maintain capability, attach to a unit as a tracking component in various wilderness landscapes, translate the fundamentals of science behind scent signatures and apply this information to increase tracking performance, utilize multiple K9 teams on a single track, develop creativity in both operations and in teaching others, and avoid counter-tracking tactics used against the handler.

This course is designed to increase the effectiveness of “professional K9 teams” and meet the high expectations of both SAR (Search and Rescue) as well as Law Enforcement. Civilian tracking and trailing enthusiasts with previous experience will also enjoy learning real world, operational proven techniques designed to increase success rates and practicing existing skill sets in a new environment.

Overnight camping stays will allow for tracking in low light conditions. Basic wilderness survival, navigational and visual tracking skills will be discussed and in some cases practiced. Students will be expected to utilize map, compass and GPS navigational skills, radio communication skills and work together as a tracking team. Students will be taught basecamp operations, search strategy and will be expected to work as a team to find subjects. Students will learn how to create and use a target packet to maximize effectiveness during search

operations. Students will be required to determine direction of travel and navigate both “tactical” and SAR problems.

Admission to the course is subject to evaluation and previous experience.

### **Qualifications to Participate:**

The HK9 Advanced Wilderness Seminar is advanced tracking students only.

The HK9 Decoy Seminar is open to all Patrol Certified / Approved handlers and K9's. Each team will have the opportunity to watch and learn from other teams and other dogs as well as participate as support members for other tracking teams.

Each tracking team will be required to take a fitness assessment at the beginning of the seminar requiring that a one mile run be completed in under 12 minutes.
